

PEDI-GIENE INSTRUCTIONAL **WALL CHART**

CLEANERS PROCEDURE GUIDE

PEDI-GIENE is a Hospital Use Disinfectant used to clean and disinfect washable hard nonporous surfaces of: whirlpool units, pedicure spa baths, salon / barber tools and instruments, combs, brushes and scissors, blades and manicure instruments. It is a proven One-Step disinfectant-cleaner-fungicide-bactericide and virucide. **PEDI-GIENE** meets all States Regulatory Agencies Criteria.

After the customer has used the pedicure tub, the following steps can be taken:

1. Fill pedicure tub with fresh water to 2 inches above the highest jet.
2. Add 1oz. of this product for each gallon of fresh water added.
3. Start the pump to circulate the solution.
4. Wash down the deck, seat of chair lift and any uncovered surfaces with a clean swab, brush or sponge with the solution.
5. Treated surfaces must remain wet for 10 minutes.
6. After the pedicure foot spa has been thoroughly disinfected, drain and rinse surfaces with fresh water.
7. Wipe dry with a clean sponge or cloth or allow to air dry.
8. Repeat for heavy soiled units.

General Disinfection of Hard Nonporous Surfaces: Mix 1oz of this product per gallon of water ($\frac{1}{4}$ oz of this product per 32oz spray bottle). **Contact Time:** Leave surface wet for 1 minute for HIV-1 and 10 minutes for HBV and HCV with a 1oz per gallon use – solution. Use a ten minute contact time for disinfection against all other viruses, bacteria and fungi claimed.

Salon / Barber Instruments and Tools Disinfection (Bactericide / Virucide / Fungicide)

Directions: Mix 2oz. of this product per gallon of water, 0.5oz. of this product per quart of water, to disinfect hard, nonporous instruments and tools. Completely immerse combs, brushes, rollers, manicure and other salon instruments and tools for 10 minutes. For heavily soiled instruments and tools, a preliminary cleaning is required. Rinse thoroughly and dry before use. Fresh solution should be prepared daily or more often if solution becomes diluted or soiled.

Note: Plastics may remain immersed until ready to use. Stainless steel shears and instruments must be removed after 10 minutes, rinsed, dried and kept in a clean, non-contaminated receptacle. Prolonged soaking may cause damage to metal instruments.

Kills HIV and HBV and HCV on Pre-cleaned Environmental Surfaces / Objects previously Soiled with Blood / Body Fluids in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces / objects with blood or body fluids, and in which the surfaces / objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS) or Hepatitis B Virus (HBV) or Hepatitis C Virus (HCV).

SAFETY DIRECTIONS

Do Not Swallow. Avoid contact with the eyes. Use protective glasses and rubber gloves.

FIRST AID

If poisoning occurs, see your doctor or a Poisons Information Center. If in the eyes, wash with plenty of water.
